**DETAILED ACTION**

***Allowable Subject Matter***

1. Claims 1-43 allowed.

***Reasons for Allowance***

2. The following is an examiner's statement of reasons for allowance:

Prior art fails to disclose or fairly suggest an antenna device comprising:

(1) a first and a second radiating conductor that meander and are symmetrically disposed on a surface of the first dielectric substrate, lower ends of the first radiating conductor and the second radiating conductor being connected at a junction; and a capacitive conductor disposed on the first dielectric substrate and connected to the ends of the first radiating conductor and the second radiating conductor, in combination with the remaining claimed limitations as claimed in independent claim 1 (claims 2-14 are allowed since they are dependent on claim 1);

(2) a first set of radiating conductors disposed on a surface of the first dielectric substrate, the first set of the radiating conductors directly connected to the ground conductor and disposed to provide an area on the surface of the first dielectric substrate where electric fields generated by the first set of the radiating conductors cancel each other out; and a capacitive conductor disposed on the first dielectric substrate and connected to the first set of the radiating conductors, in combination with the remaining claimed limitations as claimed in independent claims 15 and 32 (claims 16-31 and 33-43 are allowed since they are dependent on claims 15 and 32).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue

fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

***Drawings***

3. The drawings were received on January 20, 2004. These drawings are accepted.

***Citation of relevant prior art***
